

Investigation Report - Case NX-0311

Generated 2026-09-14T17:21:55.166049 UTC by Vikram Nair (ADMIN01)

Executive Summary

This report covers 2 subject(s) and 5 detected relationship record(s) (counted per subject), of which 3 are high-confidence. All findings are investigative leads derived from cross-source evidence correlation and require human verification before any action is taken.

Subject Profiles

Karan Verma (C005)

Case: NX-0311 | Crime type: Drug Trafficking | Status: Under Investigation

Age: 45 Phone: 9001122334 Address: 78 Jayanagar 4th Block

Reliability: 90%

Karan Verma (45, Drug Trafficking) is linked to case NX-0311. Cross-source analysis identified 2 associated entities: 2 high-confidence, 0 medium-confidence, and 0 low-confidence link(s). The strongest connection is to Vikram Das (100% confidence), supported by: Co-Accused (Same Case), Direct Contact (Call / SMS), Financial Transfer, Mentioned Together in Report, Reported Association, Shared Residence / Location, Shared Vehicle Use. Notably, Karan Verma's own case notes state no associates are known, yet cross-source analysis surfaced 2 hidden connection(s) not explicitly recorded anywhere in the source text - exactly the kind of lead NexTrace is designed to surface.

Vikram Das (C009)

Case: NX-0311 | Crime type: Drug Trafficking | Status: Under Investigation

Age: 40 Phone: 9334455667 Address: 78 Jayanagar 4th Block

Reliability: 79%

Vikram Das (40, Drug Trafficking) is linked to case NX-0311. Cross-source analysis identified 3 associated entities: 1 high-confidence, 1 medium-confidence, and 1 low-confidence link(s). The strongest connection is to Karan Verma (100% confidence), supported by: Co-Accused (Same Case), Direct Contact (Call / SMS), Financial Transfer, Mentioned Together in Report, Reported Association, Shared Residence / Location, Shared Vehicle Use.

Network Overview

Subjects: 2 Relationships: 4 Communities: 4

Significant Relationships

C005 <-> C009 (100% High)

Type: Direct Contact (Call / SMS)

- Direct Contact (Call / SMS): 2 record(s)
- Co-Accused (Same Case): 1 record(s)
- Financial Transfer: 1 record(s)
- Shared Residence / Location: 1 record(s)

C005 <-> C008 (80% High)

Type: Direct Contact (Call / SMS)

- Direct Contact (Call / SMS): 1 record(s)
- Co-located (CCTV): 1 record(s)
- Mentioned Together in Report: 1 record(s)
- Reported Association: 1 record(s)

C009 <-> C015 (60% Medium)

Type: Direct Contact (Call / SMS)

- Direct Contact (Call / SMS): 1 record(s)
- Mentioned Together in Report: 1 record(s)
- Reported Association: 1 record(s)

C009 <-> C008 (20% Low)

Type: Mentioned Together in Report

- Mentioned Together in Report: 1 record(s)

Reliability / Confidence Analysis

Karan Verma: 90% overall | Evidence 90%, Source diversity 100%, Temporal 100%

Vikram Das: 79% overall | Evidence 60%, Source diversity 100%, Temporal 100%

Potential Pattern Findings

[Medium] Bridge Entity

Meenal Desai connects two or more otherwise-separate clusters of subjects, making them a high-value node for further investigation.

[Medium] Bridge Entity

Rohit Malhotra connects two or more otherwise-separate clusters of subjects, making them a high-value node for further investigation.

[Medium] Bridge Entity

Sanjay Kulkarni connects two or more otherwise-separate clusters of subjects, making them a high-value node for further investigation.

[Medium] Potential Coordinated Activity Across Cases

Arjun Mehta (case NX-0241) and Neha Rao (case NX-0198) are linked via Colleague, Reported Association, Shared Residence / Location, suggesting the two investigations may be connected.

[High] Potential Coordinated Activity Across Cases

Ravi Sharma (case NX-0241) and Suresh Iyer (case NX-0172) are linked via Colleague, Direct Contact (Call / SMS), Financial Transfer, Reported Association, Shared Vehicle Use, suggesting the two investigations may be connected.

[Medium] Potential Coordinated Activity Across Cases

Ravi Sharma (case NX-0241) and Manoj Pillai (case NX-0172) are linked via Colleague, Reported Association, Shared Residence / Location, suggesting the two investigations may be connected.

[Medium] Potential Coordinated Activity Across Cases

Neha Rao (case NX-0198) and Priya Nair (case NX-0241) are linked via Colleague, Financial Transfer, Reported Association, suggesting the two investigations may be connected.

[High] Potential Coordinated Activity Across Cases

Karan Verma (case NX-0311) and Divya Menon (case NX-0455) are linked via Co-located (CCTV), Direct Contact (Call / SMS), Mentioned Together in Report, Reported Association, suggesting the two investigations may be connected.

[Medium] Potential Coordinated Activity Across Cases

Vikram Das (case NX-0311) and Aditya Rao (case NX-0620) are linked via Direct Contact (Call / SMS), Mentioned Together in Report, Reported Association, suggesting the two investigations may be connected.

[High] Potential Coordinated Activity Across Cases

Rohit Malhotra (case NX-0198) and Sanjay Kulkarni (case NX-0655) are linked via Direct Contact (Call / SMS), Financial Transfer, Mentioned Together in Report, suggesting the two investigations may be connected.

[High] Large Transfer to Unidentified Account

Rs. 500,000 was transferred from account ACC10020 to ACC99999, which does not match any known subject - a potential mule account or untraced fund flow.

Provenance

Every relationship above is traceable to specific source records (call detail records, financial transaction logs, CCTV sighting metadata, or investigation report narratives). Use the Evidence Repository in the application to inspect raw source rows.

Automated analysis provides investigative leads and evidence organization. It does not independently establish guilt or culpability. All confidence scores reflect the strength and consistency of available evidence and record matching.
